**MARINE  
PROTECTION  
PROJECT OFFICER  
CRAIGNISH**

**Short-term stakeholder research  
and development project to  
progress Demonstration &  
Research MPA application**

A part-time project officer is sought to conduct stakeholder research and work with the Craignish Restoration of Marine & Coastal Habitat (CROMACH) community group to prepare a proposal for Demonstration & Research Marine Protected Area status for Loch Craignish.

This relatively new form of protection is community-driven. It requires building consensus across all stakeholders on objectives, strategies, marine science collaborations and long-term governance for increasing biodiversity, monitoring, managing and protecting our loch.

We envisage the project taking 3-6 months of part-time work, but detailed timelines are up for discussion. Budget is in the region of £10,000 including costs. Candidates should have experience in research/focus groups, project management, marine issues/management and proposal writing.
